

CALL FOR PAPERS

2nd International Workshop on Data-intensive Process Management in Large-Scale Sensor Systems (DPMSS): *From Sensor Networks to Sensor Clouds*

jointly held with

CCGrid 2013 — The 13th IEEE/ACM International Symposium on Cluster, Cloud and Grid Computing

May 13-16, 2013, Delft, Netherlands

Due to recent advances in electronics and communication technologies, Sensor Networks (SNs) have been introduced and are currently emerging as one of the most disruptive technologies enabling and supporting next generation ubiquitous and pervasive computing scenarios. In recent years there has been a great surge of interest in SN-based applications, mainly focused on developing hardware, software, and networking architectures needed to enable such applications. In the future, SN will be often seamlessly integrated with decentralized distributed systems based on other networks, particularly IP-based networks. Such integration will raise new issues in the development, deployment and management of such large-scale SN-based systems. The convergence of processes and data management over large-scale SN-based systems results in the definition of the so-called data-intensive processes over large-scale SN-based systems, which represents a novel and leading context for a wide research community. In this respect, relevant issues concern with methodologies for modeling and supporting data-intensive processes, integration and fusion approaches over data-intensive processes, activation and enactment paradigms for data-intensive processes over large-scale SN-based systems, development approaches for SN-based systems, large-scale wireless sensor network systems. The aim of this workshop is to capture the new research trends and results in terms of design, architectures, techniques, and applications for the management of processes and data in large-scale systems based on sensors, with particular emphasis on the integration of large-scale SNs with Grid and Cloud infrastructures.

Areas of Interest

- Architectures for the management of large-scale SNs
- Sensor data processing using Cloud environments
- Specialist sensor networks for Cloud monitoring
- Collaborative Wireless Sensor Networks
- Integration of WSNs and mobile body sensor networks (Body Area Networks and Clouds)
- Representation models for data-intensive processes over large-scale SN-based systems;
- Indexing strategies for data-intensive processes over large-scale SN-based systems;
- Data exchange paradigms of data-intensive processes over large-scale SN-based systems;
- Data fusion primitives and methods of data-intensive processes over large-scale SN-based systems;
- Data analytics over data-intensive processes over large-scale SN-based systems;
- Data scalability, reliability, and availability aspects of data-intensive processes over large-scale SN-based systems;
- Models for data-intensive processes over large-scale SN-based systems;
- Data access methods for data-intensive processes over large-scale SN-based systems;
- Run-time support schemes of data-intensive processes over large-scale SN-based systems;
- Integration schemes for data-intensive processes over large-scale SN-based systems;
- Workflow paradigms for data-intensive processes over large-scale SN-based systems;
- SN-based Systems in e-Health, e-Factory, Smart City, etc.
- Sensor data collection via Cloud storage

Session Organizers

Alfredo Cuzzocrea, ICAR/CNR (Italy)
cuzzocrea@si.deis.unical.it
Giancarlo Fortino, University of Calabria (Italy)
g.fortino@unical.it
Omer Rana, University of Cardiff (UK)
o.f.rana@cs.cardiff.ac.uk

International Program Committee (TBC)

Mert Bal, Miami University, USA
Tania Cerquitelli, Politecnico di Torino, Italy
Raffaele Gravina, University of Calabria, Italy
Geoffrey C. Fox, Florida State University, USA
Paul Havinga, University of Twente, Netherlands
Young-Sik Jeong, Wonkwang University, Korea
Hwa-Young Jeong, Kyung Hee University, Korea
Dimitrios Katsaros, University of Thessaly, Greece
Wenfeng Li, Wuhan University of Technology, China
Pedro Jose Marron, Univ. of Duisburg-Essen, Germany
Luca Mottola, Swedish Institute of Computer Science, Sweden
Olufemi Omitaomu, Oak Ridge National Laboratory, USA
Carlos Palau, Universidad Politecnica de Valencia, Spain
George Pallis, University of Cyprus, Cyprus
Mukaddim Pathan, Telstra, Australia
Weiming Shen, National Research Council of Canada, Canada
Weisong Shi, Wayne State University

Web Site

<http://dpmss2013.deis.unical.it>

Submission Guidelines

Original papers from the above-mentioned or other related areas will be considered. Papers will be evaluated by at least three reviewers. Please submit full papers: 8 pages maximum in pdf according to IEEE format for conference proceedings. The submission link is:
<https://www.easychair.org/conferences/?conf=dpmss2013>

Publication

The proceedings will be part of the CCGrid 2013 proceedings published by the IEEE Computer Society Press, USA and will be made available online through the IEEE Digital Library.

Journal Special Issue

Selected papers presented at the conference will be invited to a special issue organized on a premier International Journal (with SCI Index) that is under selection.

Important Dates

January 18, 2013: Submission Deadline
February 18, 2013: Acceptance/Rejection Notification.
February 28, 2013: Final camera-ready papers.
May 13, 2013: Workshop Takes Place.
